Wild wild west derivative counter

Dodo

November 2022

Welcome to derivative calculator fella, let's have a look at ya. God, what da hell is dis shit, fella? Ok, ok, let's calculate this bullshit.

♣ ♣ ♣

Alright fella, let's look wat we got:

$$(\frac{(2+X)}{(ln(10 \cdot X))}) \cdot (sin(tgX)) \tag{1}$$

♣ ♣ ♣

With the power of gods, let's write the following:

$$(\frac{(2+X)}{(ln(10 \cdot X))}) \cdot (sin(tgX)) \tag{2}$$

♣ ♣ ♣

I smacked a damn big cockroach yesterday fella, this was left on my shoe:

$$sin(tgX) \tag{3}$$

♣ ♣ ♣

Don't distract fella, I don't know how to count

$$tgX \tag{4}$$

♣ ♣ ♣

Oh come on, my wife is pregnant 12th time in a row.

$$\frac{(2+X)}{(ln(10 \cdot X))} \tag{5}$$

♣ ♣ ♣

Can you understand it by yourself, i must go get some beer, fella:

$$ln(10 \cdot X) \tag{6}$$

♣ ♣ ♣

...

$$10 \cdot X \tag{7}$$

♣ ♣ ♣

Thanks man

$$2 + X \tag{8}$$

♣ ♣ ♣

Here is whach you got, fella. Now let's drink some whiskey and shoot niggers.

$$(\frac{((1) \cdot (ln(10 \cdot X)) - (2 + X) \cdot ((\frac{(1)}{(10 \cdot X)}) \cdot (10)))}{((ln(10 \cdot X)) \cdot (ln(10 \cdot X)))}) \cdot (sin(tgX)) + (\frac{(2 + X)}{(ln(10 \cdot X))}) \cdot ((cos(tgX)) \cdot ((\frac{(1)}{(cos(X))}) \cdot (1))) \tag{9}$$

♣ ♣ ♣

The solution is pretty simple and you definetely can do it **yourself**
